MASY CHARLA ROSALIE

FULL-STACK DEVELOPER

Antananarivo, Madagascar | +261 32 40 219 26 | masycharlar@gmail.com | linkedin.com/in/charla-masy-r

PROFILE

Full-stack developer with 4 years of experience building and maintaining web applications. I create interfaces with React, Next.js and TypeScript, APIs with Node.js or Python, and reliable data workflows. My work spans integration, deployment and production maintenance, including Freshworks CRM and Freshdesk, in multidisciplinary teams.

CORE SKILLS

Full-stack development: TypeScript, JavaScript, Next.js, React, Node.js, Python, FastAPI, Django, PHP, HTML, CSS

APIs & data: REST APIs, Freshworks CRM, Freshdesk, MySQL, PostgreSQL, authentication, migration and data integrity

Applied AI: model-training interfaces, chatbot integration, data preparation and structuring

Production & quality: Docker, Linux, Nginx, Git, Postman, Plesk, Azure, Google Cloud Platform, monitoring

PROFESSIONAL EXPERIENCE

Web & CRM Developer (Application Support) | Humans4Help | *April 2024 to present*

- Technical management and ongoing maintenance of more than 20 websites and environments: troubleshooting, updates, security, performance, monitoring and migrations.
- Built and integrated full-stack business features, custom web components and automations to improve operational reliability.
- Migrated JSON user data to Freshworks CRM using Python scripts for cleaning, mapping, importing and integrity checks.
- Built a payroll application with React and FastAPI, and deployed it to an Azure virtual machine.
- Deployed and integrated a chatbot across the web estate using Docker, Nginx, a reverse proxy and website integration.
- Built a React and Material UI interface for an AI model-training app, covering upload, annotation, validation, training and results, with the data science team.

Technologies: TypeScript, Next.js, Node.js, Python, FastAPI, React, Material UI, MySQL, Docker, Azure, Freshworks CRM, Freshdesk, Git

Full-Stack Web Developer | Step Up Agence / Step Up Digital | *March to December 2023*

- Built business modules, including a hotel booking module, with PHP, SQL and JavaScript.
- Implemented caching that reduced page load times by 50%.
- Led mobile-first redesigns and improved client website speed scores from 15% to over 90%.

Technologies: PHP, SQL / MySQL, JavaScript, WordPress, SEO, Linux

Web & Data Developer | TanIT Technologie | *June to November 2022*

- Automated extraction and processing of data from more than 5,000 unstructured PDF documents.
- Structured and stored data in MySQL using Python and Node.js; cleaned and migrated Excel data.
- Built an internal API connecting the extraction engine to the database, with session management and authentication.

Technologies: Python, Node.js, MySQL, SQL, REST APIs, JavaScript

EDUCATION & CERTIFICATION

Bachelor’s degree in Computer Science, Integration and Development | ESTI, Madagascar | 2021 to 2024
Google Cloud Associate Cloud Engineer | Certified in December 2024

LANGUAGES

French: professional bilingual proficiency | English: professional working proficiency

AWARDS

1st place | DevFest Hackathon 2023: clean code and competitive programming
Awarded by Google Developer Group Antananarivo and AlgoMada

1st place | Frontend Award 2023
Awarded by TechZara
